

Complete, Secure Web-based Patient Management

NetPracticeEHRweb 7.02.0 is an
ONC-ATCB 2011/2012 "Complete EHR"
Certified Solution

NetPracticeTM EHRweb

Part of the Connected Care Solution
by Noteworthy Medical Systems

**Easily and securely document
patient encounters, streamline
workflow, save time and money
and improve patient care**

Because of the way NetPracticeEHRwebTM automatically interfaces test results into our workflow, we have been able to add an additional provider without any additional support staff, and we are more in control of our patient information than ever before. NetPracticeEHRweb also allows me to access patient information from the hospital or my home when I am on call.

- Dr. Gene Wong, Family Practitioner

NetPracticeEHRwebTM is a complete, web-based patient management tool used by physician practices and hospitals to manage patient care. Going beyond the typical and expected functionality of an EHR, NetPracticeEHRweb enables provider-to-provider communications, referrals, consults, sharing of data and the ability to view patient medical data within a community—all within the normal workflow of seeing patients. And Noteworthy has you covered for Meaningful Use! NetPracticeEHRweb 7.02.0 is ONC-ATCB 2011/2012 compliant for Ambulatory.

NetPracticeEHRweb allows providers and staff a secure and convenient method of sharing patient information between hospitals, laboratories, radiology groups—even referring and consulting providers. As a component of Noteworthy's **Connected Care** solution for better care and communication among healthcare communities, NetPracticeEHRweb's easy-to-use online patient records help physicians, nurses and office professionals document patient encounters, streamline workflow, save time and money and improve patient care.

NetPracticeTM EHRweb

web-based EHR solution

NetPracticeEHRweb 7.02.0 is an ONC-ATCB 2011/2012 "Complete EHR" Certified Solution

features

▶ Providers

Quick, online access to all clinical information critical for efficiency in high volume practices; Workflow management allows staff to manage Inboxes for labs, radiology, reports and medications on behalf of providers

▶ Nurses

Quick, online access to all clinical information needed to efficiently and immediately help patients and providers without expensive 'phone-tag' and messy, risky Post-it® notes; Nurses and staff can be assigned individually or in teams to manage provider tasks making everyone more productive

▶ Billing Office

Restricted access to view notes and medication lists for insurance inquiries; Print capability; Eliminates chart pulls and speeds response to insurance inquiries

- ▶ Meaningful Use Ready: ONC-ATCB 2011/2012 "Complete EHR" Certified Solution for Ambulatory
- ▶ Interfacing Services Included
- ▶ Clinical Decision Support
